

SOF IGKO — Unit 6 Deep-Dive

Earth & Its Environment

Class III • Parent-readable notes

What this unit is about

Landforms and water bodies, weather and seasons, the water cycle, and how we can protect our environment.

1. Landforms and water bodies

Feature	Description
Mountain	Very high land with peaks (Himalayas)
River	Flowing fresh water (Ganga, Yamuna)
Ocean/ Sea	Very large body of salty water
Lake	Water surrounded by land
Desert	Dry, sandy region with little rain (Thar)
Forest	Large area of trees; home to animals
Island	Land surrounded by water on all sides

2. Weather and seasons

- **Weather** is the day-to-day condition — sunny, rainy, windy, cloudy.
- **Climate** is the long-term weather pattern of a place.
- **Four seasons:** summer (hot), winter (cold), spring (new growth), autumn (leaves fall).
- **Monsoon** — the heavy **rainy** season in India (about June–September).

3. The water cycle (very important)

1. **Evaporation** — heat from the Sun turns water from seas and rivers into **water vapour**.
2. **Condensation** — the vapour rises, cools, and forms **clouds**.

3. **Precipitation** — water falls as **rain, snow, or hail**.
4. **Collection** — water gathers in rivers and seas, and the cycle repeats.

4. Protecting the environment

- **Pollution** — dirty air (smoke), water (waste), and land (litter). It harms all living things.
 - **The 3 Rs: Reduce, Reuse, Recycle.**
 - **Save water:** close taps, fix leaks, store rainwater.
 - **Save trees:** plant more, use less paper — trees give **oxygen** and shelter to animals.
-

Common exam traps

- Order of the water cycle: **evaporation → condensation → precipitation → collection**.
 - **Oceans are salty**; rivers and lakes are fresh water.
 - **Deserts get very little rain** (not a lot).
 - The third R is **Recycle** (Reduce, Reuse, Recycle).
-

Quick recall

1. Water → vapour = **evaporation**; vapour → cloud = **condensation**
2. Rain/snow/hail = **precipitation**
3. Rainy season in India = **monsoon**
4. Salty water body = **ocean**
5. Three Rs = **Reduce, Reuse, Recycle**
6. Trees give us = **oxygen**
