

SOF NSO Science — Cheat Sheet (Units 2–7)

Food groups

Kind	Job	Examples
Energy-giving	Give power	Rice, roti, potato, sugar, ghee
Body-building	Growth, repair	Egg, milk, dal, fish
Protective	Fight disease	Fruits, green vegetables

From animals: milk, egg, honey. From plants: fruits, vegetables, grains, pulses, spices. **Balanced diet** = all three kinds + water.

Body organs & jobs

Organ	Job
Heart	Pumps blood
Lungs	Help us breathe
Brain	Think, remember
Stomach	Digests food
Bones	Give shape/support
Muscles	Help us move

Five senses: eyes (see), ears (hear), nose (smell), tongue (taste), skin (touch). Brush teeth **twice** a day.

States of matter

State	Shape	Example
Solid	Fixed	Stone, ice
Liquid	Takes container's shape	Water, milk, honey
Gas	Fills all space	Air, steam

Float: wood. Sink: iron nail, stone. Soluble: salt, sugar. Insoluble: sand. Natural: wood, cotton, wool. Man-made: plastic, glass, nylon.

Water cycle

Evaporation (Sun heats water → vapour) → **Condensation** (vapour cools → clouds) → **Rain** → collects and repeats. We breathe **in oxygen**, out carbon dioxide. Plants take in **carbon dioxide**, give out oxygen. Moving air = **wind**.

Transport & communication

Type	Examples
Land	Car, bus, train, cycle
Water	Boat, ship
Air	Aeroplane, helicopter

Fastest = aeroplane; slowest = bullock cart. Cars use petrol/diesel; cycle needs no fuel. Communication: letter, phone, TV, newspaper, internet. **Personal** = one person; **Mass** = many (TV, newspaper).

Earth & Universe

Sun = **star** (heat + light). Moon = Earth's **natural satellite**; reflects Sun's light. **8 planets**: Mercury closest, Jupiter largest, we live on Earth (Mercury, Venus, Earth, Mars...). **Rotation** (spin) → day & night. **Revolution** (round Sun) → one year. Made by people = **artificial satellite**.
